PROFILE

BFSI and analytics professional with an MBA in Finance & Business Analytics, experience in financial analysis, banking operations, data analytics, and management reporting. Skilled in Excel, Power BI, Tableau, SQL, and Python, with a track record of reconciling financial data, building forecasting and scenario-driven models, and translating complex, unstructured datasets into clear, actionable insights for stakeholders across credit, operations, and finance functions.

PROFESSIONAL EXPERIENCE

Data Analyst Intern - Weltern Pvt. Ltd.

Feb 2026 – Present | Online

- Improved dataset reliability across client projects, as measured by elimination of missing values, nulls, duplicates, and outliers, by running structured data-quality audits and cohort-level consistency checks.
- Increased analysis-ready output for downstream teams, as measured by clean, standardized datasets, by handling null values, removing duplicates, and treating outliers across segmented client data.
- Improved management visibility into data issues, as measured by faster corrective-action turnaround, by preparing structured reports translating raw data patterns into business-ready findings.

Management Trainee - Home First Finance Company

May 2025 – Dec 2025 | Mumbai

- Recovered INR 50L from 3 high-risk NPA accounts, as measured by full repayment closure, by building risk segmentation across delinquency cohorts and applying structured recovery logic under RBI compliance.
- Maintained 100% accuracy and zero compliance breaches, as measured across 10+ monthly financial reconciliations and documentation packages, by validating records against business rules within 8-hour SLA timelines.
- Reduced documentation rework by 25% within one month, as measured by fewer repeat corrections, by analyzing complaint patterns and coordinating stakeholder alignment across a 7-member credit and operations team.

Financial Analyst Intern - Airway Media

Jan 2024 – Apr 2024 | India

- Improved accuracy of business-performance reviews, as measured by model outputs adopted in management discussions, by developing and organizing financial models segmented by business unit.
- Converted raw financial data into decision-ready outputs, as measured by adoption in performance reviews, by applying structured financial modelling and pattern analysis techniques.

Data Analyst Intern - Infosys

Mar 2023 – May 2023 | Remote

- Reduced financial report generation time by 75% for 2 business units, as measured by turnaround time, by automating reporting workflows with Excel VBA and Macros.
- Reduced manual reconciliation effort by 30%, as measured by hours saved per cycle, by building Excel tracking tools for issue-resolution monitoring and escalation.
- Improved management reporting consistency, as measured by error-free submissions, by producing formal, error-controlled financial reports for review.

PROJECTS

Churn-AI - Customer Churn Analytics Platform

Independent Project | Jun 2026 | [View on GitHub](#)

- Analyzed 6,418 customer records across 32 attributes, as measured by a complete churn diagnostic covering demographic, service, billing, and geographic dimensions, by building an automated EDA pipeline in Python (Pandas, Matplotlib, Seaborn).
- Identified competitor-driven churn as the dominant driver (761 of 1,732 churned customers), as measured by category and root-cause breakdown, by segmenting churn reasons, contract types, and internet service categories.
- Surfaced actionable retention levers, as measured by a 46.5% month-to-month vs. 2.7% two-year contract churn gap and 5 geographic churn hotspots, by combining correlation analysis with an AI-assisted (Claude) reporting layer built in React and Python.

Superstore Management System - EDA

Independent Project | Apr 2026 | [View on GitHub](#)

- Analyzed \$12.74M of simulated sales across 1,000+ orders, as measured by complete exploratory and inventory analysis, by generating data with Python Faker, NumPy, and Pandas.
- Improved sales and inventory visibility, as measured by 194 low-stock items and 989 customers tracked across 4 regions, by building 3 Power BI dashboards covering key KPIs.

Banking Analytics - Risk Profiling & Portfolio Analytics Dashboard

Independent Project | Feb 2025 | [View on GitHub](#)

- Identified data patterns, inconsistencies, and exception anomalies across 3,000+ banking transactions, as measured by segmented risk groups, by classifying clients on income tier, loyalty, and credit risk using SQL and Python.
- Reduced manual analysis effort by 40%, as measured by time saved per review cycle, by consolidating 4 operational KPIs into a Power BI dashboard for stakeholder portfolio reviews.

SKILLS

Analytics: Excel (VBA, Macros, Advanced Formulas, Dashboards), Power BI, SQL (Joins, Window Functions, CTEs), Python (Pandas, NumPy, Matplotlib, Seaborn), Tableau

Finance & BFSI: Financial Modelling, DCF, WACC, Trading Comps, Credit Risk Fundamentals, NPA Recovery, Loan Portfolio Monitoring, Transaction Profiling
Operations: SLA/KRA Tracking, Transaction Processing, Data Quality, Regulatory Compliance Reporting, Issue Resolution, Escalation Management, Formal Reporting

Tools: Jupyter Notebook, VS Code, Git/GitHub, Google Sheets, MS Office Suite

EDUCATION & CERTIFICATIONS

Jagdish Sheth School of Management, Bangalore — MBA in Finance & Business Analytics | 2023 – 2025

Certifications: Coding Ninjas – [Data Analysis with Generative AI](#) | Jobaaj – [Financial Modelling & Valuations](#) | Infosys – [Agile Scrum](#)
